

Child protection policy

The Child Protection Policy is the outcome of consultation with key stakeholders (i.e. human rights lawyer, child protection specialists and local partners working with children on-ground) and aims to act as a guide to managing any interaction with children in media content. Particular attention is given to hiring new employees, and collaborating with contractors, guests, volunteers and/or visitors as well as using social media tools. SAT-7 E&D is committed to extensively promoting this Child Protection Policy, not only internally but also with its local partner organisations working with children on-ground. In case of harm or suspected harm to children, SAT-7 E&D's immediate and professional mechanisms respect the relevant laws in force.
