

Environment policy

SAT-7 E&D programs and activities do not have a direct impact on the environment and are not dependent on a certain environment. SAT-7 E&D are committed to providing quality programming in a manner that ensures a safe and healthy workplace for our employees and minimises our potential impact on the environment. We will operate in compliance with all relevant environmental legislation and we will strive to use pollution prevention and environmental best practices in all we do.

SAT-7 staff in all the offices are trained to mind the environmental aspects of the work in the office environment and producing programs. Necessary flights for administrative staff to the center has been identified as a negative climate effect. SAT-7 is however trying to keep this at a minimum through frequent online communication.
