

### ***Gender equality policy***

There is fundamental equality between women and men where both have a responsibility to work together to restore humanity within their environment. SAT-7 E&D knows for a fact that women and girls are often more adversely affected by poverty and have less opportunity to influence how they live their lives. This means that the fight to eradicate poverty has to involve strengthening women and girls' status in society that will lead to improvements in equality between women and men. Therefore SAT-7 E&D actively promotes equality in considering both culture and the structure of society and organisations.
